VR SERIES

A smart solution with stylish design

The VR200 is an Android-based POS terminal designed specifically by Casio that offers both an embedded application and an open platform. The embedded application is Casio's software, designed specifically for small to medium sized hospitality and retail applications.

Additional highlights of the VR200 include the 10.4" colour touch screen, a built-in 80mm thermal printer, a pop-up 2x20 customer display, an Ethernet port for high speed communications between terminals and the internet, multiple serial ports for peripheral connectivity, cash connector and an SD Card for program backup.

VR200

- Easy to operate 10.4 inch LCD
 - Integrated thermal printer (80mm or 57mm)
 - Simple Programming and Maintenance
 - Customer management and loyalty database
 - Reservations
 - Stock Control
 - Compact, small footprint
 - Water and dust resistant
 - Low power consumption
 - Low running costs
 - E-mail remote operation
 - Android operating system for reliability
 - Excellent system stability, including rapid fault recovery
 - Cloud reporting and program management
 - Integration to Xero
 - Handheld ordering option
-

VR SERIES

Introducing the VR7000 and VR7100, retail business terminals equipped with 15.6-inch wide screen LCD. These terminals support a wide range of retail operations, from small shops to chain stores, and feature a stylish design suitable for installation in any location. Much more than simple cash registers, they are information terminals that innovate and transform retail management by delivering flexible scalability to expand the scope of retail businesses.

VR7000 / 7100

- Landscape and Portrait display options on a 15.6" wide screen
- IP53* Compliant for environment durability
- Simple Programming and Maintenance
- Android operating system for reliability
- Customer management and loyalty database
- Reservations
- Stock Control
- Low power consumption
- Low running costs
- E-mail remote operation
- On-board battery protection
- Cloud reporting and Program Management
- Wifi & Bluetooth available on VR7100
- Integration to Xero
- VESA mountable
- Internal battery to minimise power disruption
- Handheld ordering option

* Falling rain at an angle up to 60° shall have no harmful effect

CASIO CLOUD

For VR Series

The cloud can support multiple stores in multiple locations and it's easy to configure for one off events or on-going business.

Live Dashboard Sales Screen

- Dynamic pie chart of top 16 products constantly updates as sales are received per location
- Consolidated listing of PLU's sold during that day per location
- Multi Time Zone Support allows live sales to be viewed from any region
- Finalizer, Gross and Net Totals dynamic updates
- Terminal Status colours allow users to identify which terminals are online

End of Day Report

- Filters support time/date frame, stores, locations and terminal number
- Exports both to PDF and CSV
- Favourites short cut setting available

Programming

- Remote price and product changes
- Set new products with auto key layout

HANDHELD ORDERING

For VR Series

Designed for restaurants, handheld ordering is simple to set up and use. It improves the flow of orders to the kitchen, offering customers seamless service, and gives staff the ability to up-sell.

Key Features

- One license can be used with multiple devices (up to six devices per license)
- Android tablet software, with the same look and feel as used on the Casio VR Series
- Table-side ordering, making staff recommendations and up-selling easier
- Ability to tailor prompts for specific menu items
- Quick overview of front of house to check table availability, which course customers are on and how many people are seated
- Graphic representation of table plan
- Customisable to meet customer requirements

SR SERIES

Smart and simple, connected ECR's

The next generation cash register connects to smartphones via Bluetooth®. The Casio ECR + smartphone app offers a range of features including register configuration and the ability to check sales figures. It's an information terminal that transcends conventional cash registers to simplify operation and help your business grow.
